

**PRODUCT OF
SOUTH AFRICA**

Slurry Master was established to manufacture and supply replacement parts and pumps for the slurry market – With over a hundred years of collective knowledge and experience in the pump industry. We have the technical support systems in place to consult on any pump system analysis and fault finding.

VISION

We maintain our combined vision to make Slurry Master a strong and reliable brand name in the mining industry. Rising to the challenges of a rapidly growing mining industry.

MISSION

Our core business purpose is customer satisfaction through superior service delivery in the highly demanding Mining Industry.

VALVES

CONVEYORS

ROLLERS

SCREEN PANELS

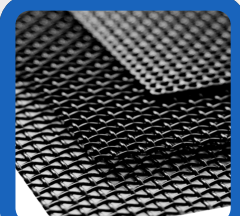

POWER TRANSMISSION

BEARINGS

V-BELTS

SCREEN MESH

SERVICES

Our entire design and manufacturing operation is carried out under one roof. Affording us more quality control and allowing us to streamline our workflow. We offer an array of value-added services to our product range. We believe it is our service excellence that builds and nurtures a mutual relationship with our customers.

Pattern Making / Precision Foundry Casting

Since its inception in 2007, our Foundry division has been one of our main concerns; servicing many customers with their casting requirements. Our foundry casts 10 tons on average per day and is accompanied by a Pattern Shop, Pattern Store and Testing Laboratory. Our foundry is renowned for superior casting in Chrome, Cast Iron, Stainless Steel (All grades), Bronze, SG and Specialized Alloys.

Repair & Refurbishment / Breakdown / Maintenance & Service Division

Our maintenance and service technicians are on standby 24/7, available for spares dispatch and on-site breakdown repairs. Our workshop technicians are repairing and refurbishing pumps daily, making sure that service exchange units are readily available, ensuring minimal downtime on site.

Plant Design / Pump Selection / Project Management / Turnkey Projects

Whether it's a single pump selection, more detailed plant design or an entire turnkey solution that you require. Slurry Master is home to some of the industries most skilled and experienced engineers and project personnel, who work attentively on seeing your project through till the very end.
